Plans of any type including those for leading organizations through crises and recovery are only as successful as the leaders who implement them. Leaders who can be creative, nimble, flexible, and open to communication will be better able to face the challenges that continue to confront us. Most important is to stay in close contact with both staff and service participants to know what they need and assure they are getting it. Please join these seasoned leaders as we continue to explore the challenges we are all facing in reopening and reimagining our services in these uncertain times.
